2001 Rhode Island State and Municipal Law Enforcement Technology Survey

The Rhode Island Justice Commission is pleased to release the results of the second annual ***State and Municipal Law Enforcement Technology Survey***. The survey is designed to obtain information from law enforcement agencies regarding the use of computer technology. In turn, that information can be shared and "best practices" duplicated throughout the state.

In 2001 Rhode Island law enforcement agencies continued to improve their computer operating capabilities. Additionally, the following is noteworthy:

- The Local Law Enforcement Planning Committee allocated Edward Byrne Memorial Discretionary funds for digital imaging training and additional RILETS licenses;
- National Criminal History Improvement Program funds were used to purchase additional livescan machines;
- The Rhode Island Department of Attorney General completed the criminal history repository upgrade project.
-

The Justice Commission appreciates your continued interest and support in the programs we administer and we look forward to further assisting your agencies as we strive to improve the criminal justice system in Rhode Island.
